Dec 2020 - Dec 2021

Company: COMSATS University Islamabad

Tools: React.js, Ajax, Axios, Html5, CSS, Bootstrap

- S.E.A(Student Education Assisstor) helps students to share their academic resources.
- For advanced searching, S.E.A. uses OCR to filter the texts from the pdf files.
- Students can view nearby tutors.
- S.E.A. uses web scrapping to help students to find national and international scholarships.
- Students can give a self-assessment quiz on our platform.
- S.E.A. enables the users to post a job and will be shown to specific users with the required job skill.
- S.E.A. authorize users to bid on a job after an assessment quiz.
- The project is implemented in the MERN stack.
